IN THE CLAIMS

Please add the following new claim:

28. (New) A computer-implemented apparatus for managing experiments relating to automated processing technology, comprising:

- (A) means for receiving an experiment order, the experiment order including at least some deviation from a base process capable of operating in an automated environment;
- (B) means for obtaining an approval of the experiment order;
- (C) means for translating and storing at least a portion of the experiment order into processing data suitable for implementation by said automated environment; and
